

# Severe Weather Emergency Procedure

## LAKE CARROLL CAMPGROUND

**To the best of the Association's ability,**  
the following emergency procedure will be followed  
when the National Weather Service has issued either a  
**Tornado WARNING** or **Severe Weather Warning**  
**with sustained winds of 40 mph or more:**

**Security Patrol Car will drive through each pod  
in the campground with lights and siren on.**

This will be your notification that severe weather warning has been issued for the area by the National Weather Service. You should move to a safer location as quickly and safely as time permits. The closest location is the lower level of the lodge in the hallway outside the showers.

*Your cooperation is appreciated,*  
**LCA Management &  
Security Department**
